Professional Summary

Motivated and detail-oriented Computer Engineering student with strong foundations in Java, Python, Machine Learning, and Full-Stack Web Development. Adept at designing scalable systems and solving complex problems. Seeking a Software Development Engineer role to apply analytical thinking, teamwork, and technical expertise to build impactful solutions.

Skills

Programming Languages: Java, Python, JavaScript

Web Technologies: HTML, CSS, Express.js, React.js, EJS, Bootstrap

Artificial Intelligence and Machine Learning: Scikit-learn, NumPy, Pandas, Data Preprocessing, Model Training, Classification, Regression

Databases: MongoDB, SQL

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Tools and Platforms: AWS, Git, VS Code, IntelliJ IDEA, Jupyter Notebook

Experience and Projects

OpportunityX – Career Portal Platform | [Live Demo]

Jun 2025 – Aug 2025

- Enhanced a career management platform used by 100+ students for **placements, hackathons, DSA practice, and interview experience sharing**.
- Offered **Placement and Hackathon modules** enabling admins to manage opportunities and student applications, while students could apply, track, and search for companies/events.
- Built a **DSA Practice Hub** featuring 150+ company-wise coding problems for structured interview preparation.
- Launched an **Interview Experience Sharing feature** with likes, comments, and moderation tools.
- Delivered an admin dashboard for analytics on placement outcomes and participation.
- Secured the platform using JWT and Google OAuth2.0 with role-based access.
- **Tech Stack:** Node.js, Express.js, EJS, HTML, CSS, JavaScript, MongoDB, Bootstrap | *MVC Architecture*

Accommodation Finder Platform | [Live Demo]

Feb 2025 – March 2025

- Engineered a comprehensive accommodation platform that streamlined student housing searches by aggregating 100+ rental listings with detailed information. Implemented advanced search filters, reducing search time by 30% and helping over 10 students find hostels efficiently.
- Enabled **owners** to publish and manage listings, while allowing students to browse, filter by location or name, and contact owners directly. This system assisted over 10 students in securing suitable hostels.
- Established a **rating and review system** to support informed decisionmaking.
- Integrated secure **login and authorization** (email/password) to prevent unauthorized access.
- **Tech Stack:** Node.js, Express.js, EJS, HTML, CSS, JavaScript, MongoDB, Bootstrap | *MVC Architecture*

Movies Recommendation System

- Developed a movie recommendation system using Python and Machine Learning techniques.
- Implemented content-based filtering using genres, ratings, and movie metadata.
- Improved user experience by providing personalized movie suggestions.
- **Tech Stack:** Python, Numpy, Cosine Similarity, Pandas

Achievements and Certifications

- AWS Cloud Technology Consultant - [Coursera]
- CCNA: Introduction to Networks - [CISCO]
- Solved 300+ DSA Problems on – [LeetCode]

Education

B.Tech in Computer Engineering

Vishwakarma Institute of Information Technology, Pune

Graduation: 2027

CGPA: 8.28 / 10
